SUMMARY

Motivated and detail-oriented Computer Science fresher with a strong interest in coding, problem-solving, and building responsive web applications. I have hands-on experience through college projects and training in web development, where I worked with technologies like HTML, CSS, JavaScript, React, and Git. I'm eager to apply my skills in a real-world setting, contribute to impactful projects, and grow as a developer in a collaborative environment.

PROJECTS

University Management System

- Designed and developed a complete web-based system to manage student, faculty, and academic data in a university setup.

Tiffin Website

- It allows customers to order food from local restaurants.
- To improve this, describe the specific features you implemented, such as a user interface for browsing menus, a shopping cart, or an order placement process.

Gemini Clone

- It's a responsive AI chatbot built with React and Tailwind CSS that uses Google's Gemini API. This is excellent.
 - You can elevate it by describing the challenge you faced and how your solution provided intelligent, context-aware responses.
-

EDUCATION

Bachelors in Computer Science & Engineering

2021-2025

Chandigarh University, Gharuan CGPA:7.61

Intermediate(H.P BOARD)

MARCH 2020

S.D Public Senior Secondary School, Santokhgarh Percentage:79%

Matriculation(H.P BOARD)

MARCH 2018

S.D Public Senior Secondary School, Santokhgarh Percentage:84%

ADDITIONAL INFORMATION

Programming Languages: JAVA, Python

Frontend Technologies: HTML, CSS, JAVASCRIPT, REACT.JS

Frameworks & Tools: Git, Google Gemini API, Tailwind CSS

Certification: Front-End Web Development with React • Mobile Development and JavaScript • Automate Cybersecurity Tasks with Python

TRAINING

Virtual Internship Program | Bharat Intern

- Actively participated in a virtual internship program focused on gaining practical skills in web development. Collaborated with a virtual team to solve problems and improve coding skills.
